

Comprehensive cloud-based endpoint protection for workstations, laptops and servers.

Seqrite Endpoint Protection Cloud is a simple yet powerful platform that lets you remotely manage multiple endpoints from anywhere. It ensures complete security with easy manageability, whether on the move, at work, or at home. It offers a wide range of cutting-edge features like Advanced Device Control, DLP, Web Filtering, Asset Management, etc., to ensure complete security and control.

Why Seqrite Endpoint Protection Cloud?

1

Comprehensive Cloud-based Endpoint Protection and Control

Manages corporate endpoints directly from the cloud without any hardware and helps to enforce control over web access and data with a wide range of features such as Advanced Device Control, DLP, Asset Management, etc.

2

Multi-layered Protection

Recognized by various industry certifications, it integrates innovative technologies like Advanced DNA Scan, Behaviour Detection, and Anti Ransomware to protect your system from malware and advanced threats at different levels.

3

No Technical Expertise Needed

The cloud-hosted solution is upgraded automatically, requiring no resource involvement and technical expertise. It provides faster delivery of product upgrades, automatically rolling out to endpoints.

4

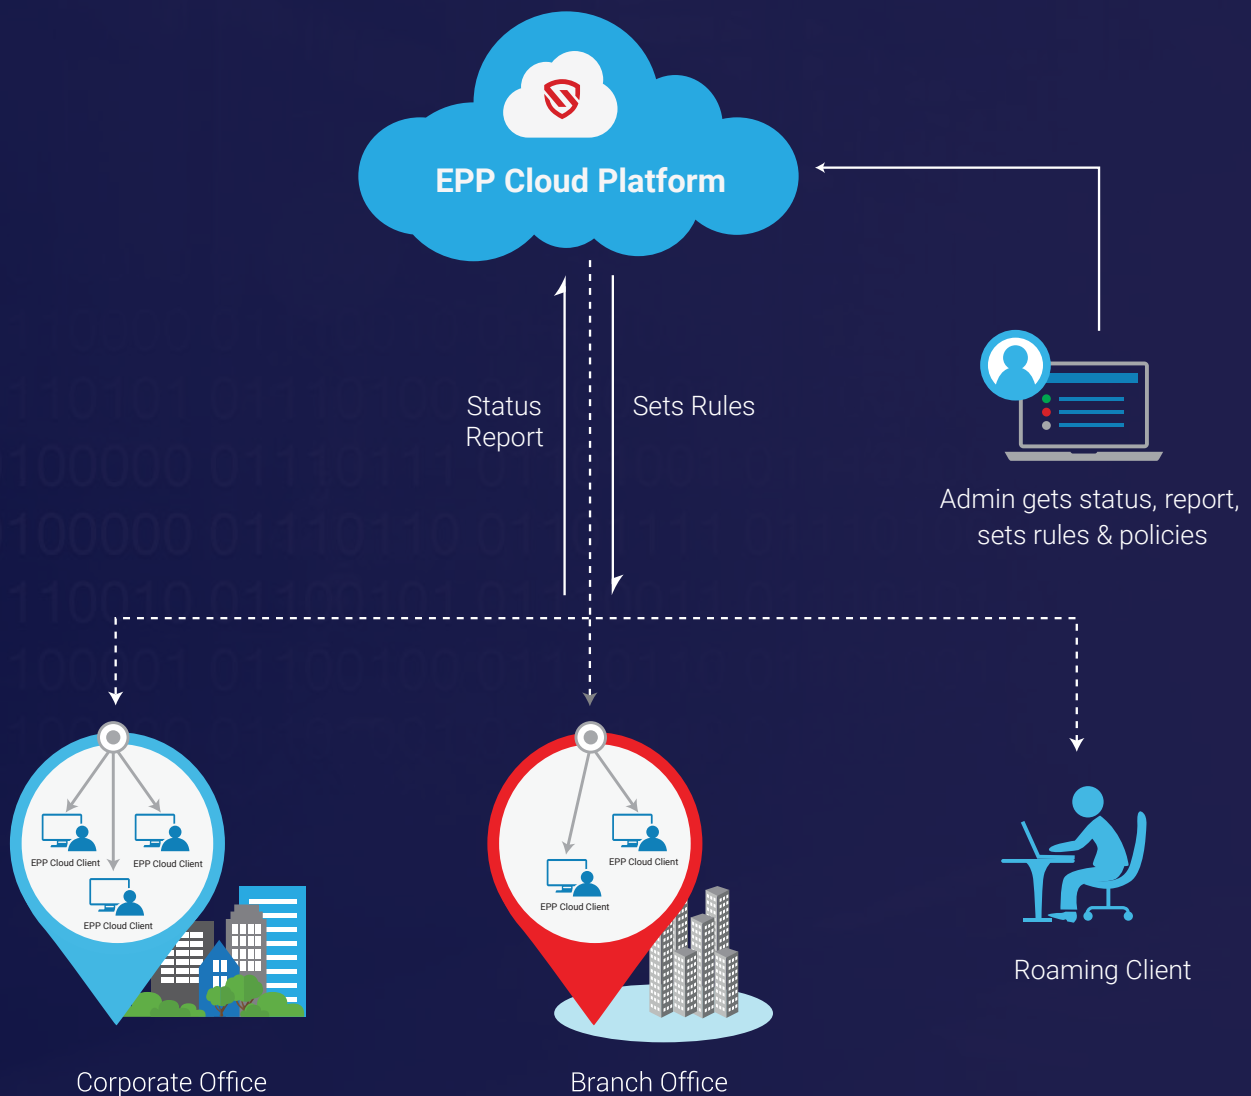

Centralized Management and Control

Has a user-friendly interface for monitoring, configuring, and managing multiple systems in the network with detailed reports and a graphical dashboard.

One Platform Solving Many Problems

Seqrite Endpoint Protection Cloud

Feature Description

Core Protection

Antivirus

Offers malware protection that is certified by leading industry certifications.

Anti-Ransomware

Protects from ransomware attacks and automatically takes backup of files.

File Sandboxing

Integrates with Seqrite Cloud Sandbox to analyze suspicious files for malware, eliminating the need for additional hardware or software for Malware Analysis.

Web Protection

Browsing Protection

Blocks malicious sites.

Phishing Protection

Blocks phishing sites.

Web Filtering

Blocks sites as per their categories.

Google and YouTube Access Controller

Blocks Personal and allows Corporate Google Access based on the administrator's chosen account domains. Blocks YouTube Videos depending on the Content Category, Publisher Name, etc.

Scheduled Internet Access

Allows scheduling time-based internet access.

Endpoint Management and Control

Centralized Endpoint Log Collection

Facilitates easier troubleshooting by allowing administrators to collect debugging logs directly from the EPP console.

Dedicated Server Security Policy

Offers specialized policies for Windows Servers, accessible via the console, to address their environment's unique security needs.

Advanced Device Control

Enforces policies for storage, mobile and wireless devices, and network interfaces on endpoints. Extends full device control to Apple M1, M2, and M3 devices for comprehensive security.

Application Control Safelist

Restricts application access using Zero Trust. Defines permissions based on the OS, including default OS and Seqrite apps. Offers a 'Monitoring Only' mode to log access without blocking.

Policy Audit and Difference Logs

Tracks policy changes with detailed logs, categorized differences, and clear before-and-after insights for compliance and forensic analysis.

Network Protection

Firewall

Monitors inbound and outbound network traffic based on rules.

IDS/IPS

Detects and blocks malicious network activities exploiting application vulnerabilities. Displays attacker IPs in IDS/IPS reports for enhanced threat response.

Feature Description

Data Protection and Security

Data Loss Prevention

Monitors and protects confidential data across devices, networks, and apps with RegEx-based rules and custom app tracking. Enables watermarking (Timestamp, IP Address, User Name) to Microsoft Office files for secure sharing.

BitLocker Encryption Management

Centrally manages BitLocker encryption policies, keys, and recovery options to ensure strong data security and regulatory compliance.

Security and Compliance

Patch Management

Offers centralized patch management solution to fix vulnerabilities of Microsoft and non-Microsoft applications.

Vulnerability Scan

Provides summarized view of vulnerabilities as per severity.

Asset Management

Gives total visibility of hardware and software running on endpoints and helps track software/hardware changes happening on endpoints.

Centralized Management & Deployment

Cloud-Based Administration

Offers cloud-based administration with a graphical dashboard, group and policy management, email notification, and easy deployment.

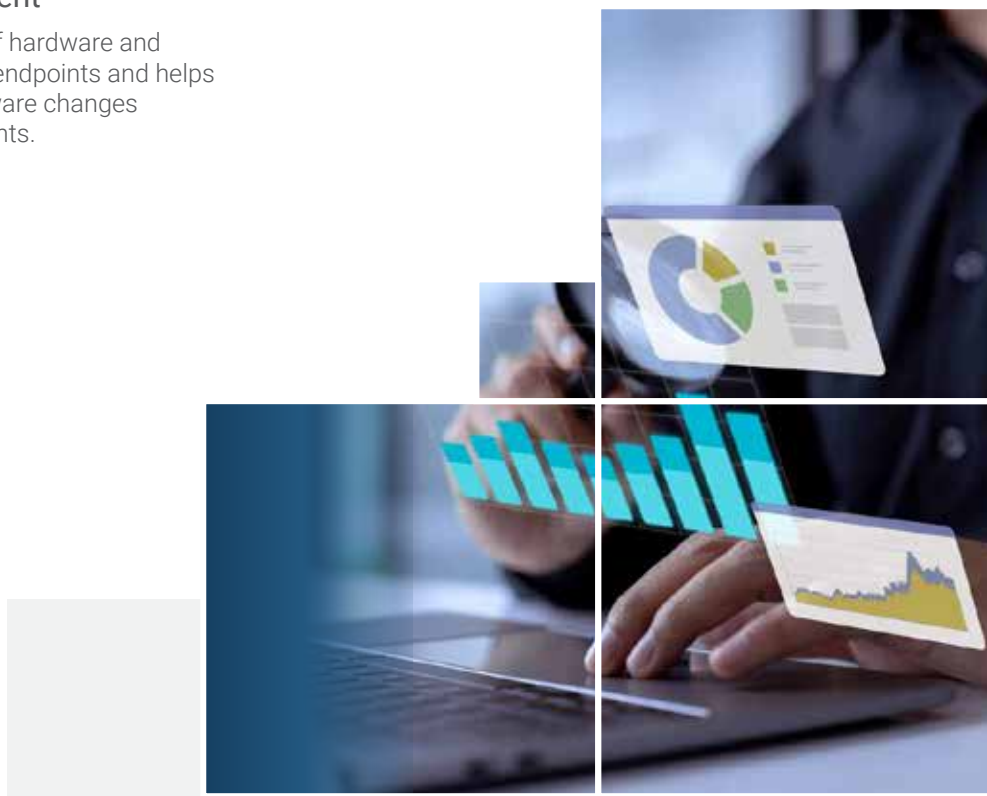

Seamless migration from on-prem to cloud

Simplifies your transition from Endpoint Protection v8.3 and v7.6 to the advanced capabilities of Endpoint Protection Cloud through a streamlined upgrade path.

3rd Party App Remover

EPP Agent installation ensures effortless migration to Seqrte Endpoint Protection Cloud by removing earlier AVs on endpoints, reducing the unprotected time duration.
